

Text around a circle ...

Here's a quick Photoshop mini-tutorial to help you type text around a circle ... this is what I do!

1. Choose your Ellipse tool from your toolbar. Hold down shift and draw a circle.
2. Click on your text tool, in the toolbar, and click on the outside of the circle. Your cursor will change into a t with a wavy line through it.
3. Now type. You can select your type, change the font, size, colour, just as you would normally do! Delete your circle when you are done.
4. And that's all there is to it!!! Enjoy!
